

PRODUCT CATALOG

**CIRCULO**

Circulo was created in 1938, in Gaspar, a small town in Santa Catarina, Brazil. The company is the result of Mr. Leopoldo Schmalz's dream of producing yarn and threads for arts and crafts. Today, we are one of the largest textile industries in Brazil, present in more than 40 countries.

We create and seek the most innovative ideas and we apply in our products, always striving for tradition and care throughout the production process. It is possible to see (and feel) the results in our excellent materials, which value even more designs and all the love, care and affection that each artisan dedicates in the making of their projects.

The handmade trend gains more strength and attracts even more people, places and styles every year and to celebrate a year of great creativity and innovation, we have once again renewed our Círculo product catalog. It is full of novelties accompanied by all the quality of amazing products, perfect colors, and charming pieces!

Get ready to see the most beautiful and essential materials for arts and crafts. Check out a variety of threads and yarns developed with love and affection for the handmade world in the next pages!

Download our Love Círculo app to keep up with all the news and information about arts and crafts. Our app is the first and the only one about arts and crafts in Brazil and now available to you in English and Spanish. It offers excellent content for those who love handmade, from countless free patterns and e-books, pooling technique tool and much more!

Download the Love Círculo app right now. Free for Android and iOS devices!

## SUSTAINABILITY

Environmental preservation has become part of our daily lives. It is believed that we need to move towards a more sustainable world. In order to do so, we are constantly investigating the market for new technologies and developing internal solutions to make products more sustainable.

### OEKO-TEX

OEKO-TEX is an international certification that ensures, through a series of tests and analysis of samples, that 100% cotton products manufactured by Círculo do not have toxic substances that can cause harm to health. This certification is renewed annually, as well as the criteria that is reviewed with the same frequency.

### BETTER COTTON

The Better Cotton Standard System is a holistic approach to sustainable cotton production which covers all three pillars of sustainability: environmental, social and economic. The system is designed to ensure the exchange of good practices, and to encourage the scaling up of collective action to establish Better Cotton as a sustainable mainstream commodity.

### DYE CLEAN

The Dye Clean process was adapted on a pioneering way and today we are the only Brazilian yarn company that uses this process to dye some of the colors of our yarns. This process allows that the water used in the dyeing process can be used for several products with no need to be replaced for clean water. That option results in an economy of 90.92% of water on the yarns that the process was implemented.
